

ABSTRACT OF THE DISCLOSURE

- A hair clipper having a pivoting clipper head is provided. The hair clipper has a 5 clipper head, a handle and connectors for connecting the handle and the head. The clipper head has a cutting assembly located thereon. The handle has a longitudinal axis, a motor and a drive shaft driven by the motor. The connectors connect the clipper head and the handle such that the clipper head pivots about an axis of rotation that is perpendicular to the longitudinal axis of the handle.
